

An Intelligent AI Modeling and Workflow Design Tool

Cross-Platform Compatibility

Note: Compatibility does not imply sponsorship, certification, or endorsement by the above platforms or their companies.

 **MICROIP** is a Taiwan-based company specializing in high-performance, low-power ASIC and AI design services. Through CATS (Custom ASIC Technology & Solutions), the company accelerates custom chip development and reduces integration costs. CAPS (Cross-Platform AI-Powered Solutions) provides software–hardware integration that enables rapid AI deployment across industrial automation, automotive electronics, AI-powered drone solutions, and robotics.

AIVO

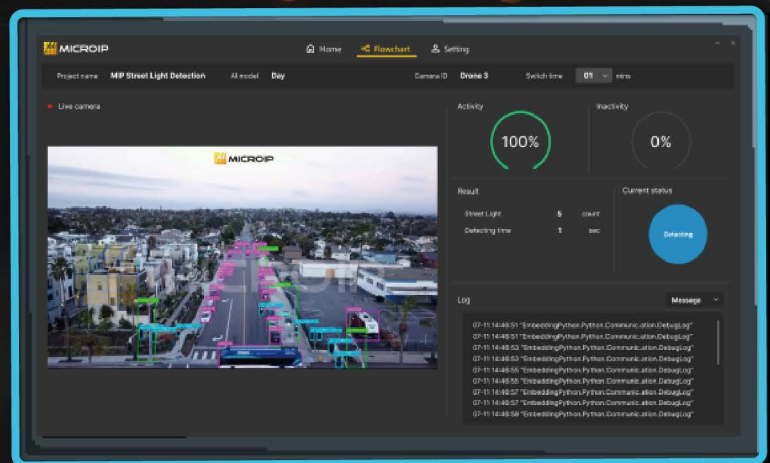

An Intelligent AI Modeling & Workflow Design Tool

Drone + AIVO Edge (MICROIP ASIC)

AIVO Process

AI-Powered Smart Drone

With AIVO for real-time perception and autonomous control, the drone performs object tracking, path planning, obstacle avoidance, and 3D mapping. Ideal for disaster relief, crop spraying, military, and smart city applications.
